SUMMARY

Computer Science Student at Qassim University. Demonstrated strong self-learning, technical skills, and completed large-scale projects independently.

EXPERIENCE

❖ full stack software development , شركة الرعاية المتناهية للتأهيل Oct 2025 — Feb 2026

القصيم

Building an integrated human resources management system to manage employee information, salaries, attendance, transportation, and buses and to issue reports, statistics, suggestions for improvement, and continuous data monitoring for a health care company with more than 600 employees.

❖ web developer , مكتب بصمة الأرض May 2025 — Jun 2026

القصيم

The landing page for an environmental services office in Qassim aims to reach users via their browsers, introduce the office's services, facilitate quick communication with clients, and display comments and experiences from previous clients automatically. Together, we set up an email system that uses a distinctive domain representing the official communications of the office.

❖ web development , مكتب صالح الحيسوني للمحاماة Jul 2025 — Aug 2026

القصيم

A landing page for a law firm in Qassim aims to reach users via web browsers, introduce the firm's services and legal specializations, and provide rapid communication. This includes support for search engine optimization, a distinctive domain name, and an official email address for formal communication with the court.

❖ website development , Personal Feb 2025 — Apr 2026

القصيم

A free educational website to prepare students for the Saudi Commission for Health Specialties exam(Prometric), featuring a question library with over 8,000 questions, along with customized tests designed for learning and improvement, a comprehensive analysis of weaknesses for the purpose of improvement, and continuous monitoring of the student's level and readiness.
